SECTION 706
Signs

706.01 Findings, purpose and intent; interpretation.

- 706.01-1 Signs obstruct views, distract motorists, displace alternative uses for land, and pose other problems that legitimately call for regulation. The purpose of this article is to regulate the size, color, illumination, movement, materials, location, height and condition of all signs placed on private property for exterior observation, thus ensuring the protection of property values, the character of the various neighborhoods, the creation of a convenient, attractive and harmonious community, protection against destruction of or encroachment upon designated historic areas, and the safety and welfare of pedestrians and wheeled traffic, while providing convenience to citizens and encouraging economic development. This article allows adequate communication through signage while encouraging aesthetic quality in the design, location, size and purpose of all signs. This article shall be interpreted in a manner consistent with the First Amendment guarantee of free speech. If any provision of this article is found by a court of competent jurisdiction to be invalid, such finding shall not affect the validity of other provisions of this article which can be given effect without the invalid provision.
- 706.01-2 Signs not expressly permitted as being allowed by permitted use under this article may be applied for as a conditional use pursuant to section 802.04 of this ordinance.
- 706.01-3 A sign placed on land or on a building for the purpose of identification, protection or directing persons to a use conducted therein shall be deemed to be an integral but accessory and subordinate part of the principal use of land or building. Therefore, the intent of this article is to establish limitations on signs in order to ensure they are appropriate to the land, building or use to which they are appurtenant and are adequate for their intended purpose while balancing the individual and community interests identified in subsection 706-01-01(01) of this section.
- 706.01-4 These regulations are intended to promote signs that are compatible with the use of the property to which they are appurtenant, landscape and architecture of surrounding buildings, are legible and appropriate to the activity to which they pertain, are not distracting to motorists, and are constructed and maintained in a structurally sound and attractive condition.
- 706.01-5 These regulations distinguish between portions of the County designed for primarily vehicular access and portions of the County designed for primarily pedestrian access.
- 706.01-6 These regulations do not regulate every form and instance of visual speech that may be displayed anywhere within the jurisdictional limits of the County. Rather, they are intended to regulate those forms and instances that are most likely to meaningfully affect one or more of the purposes set forth above.
- 706.01-07 These regulations do not entirely eliminate all of the harms that may be created by the installation and display of signs. Rather, they strike an appropriate balance that preserves ample channels of communication by means of visual display while still reducing and mitigating the extent of the harms caused by signs.

Evidence of such recording shall be exhibited to the Building Official prior to the issuance of a building permit. In the event that the lots are combined, compliance with applicable area, yard and setback requirements shall be determined based upon the outside boundaries of the combined lots. *Amended 3/1998*

708.02 Nonconforming Structures.

Where a lawful structure exists at the time of enactment or amendment of this Ordinance that could not be built in the district in which it is located by reason of restrictions on lot coverage, height, yard dimensions, or other requirements, such structure may be continued so long as it remains otherwise lawful, subject to the following provisions:

708.02-1 Any structure or portion thereof declared unsafe by the Building Official may be restored to a safe condition, provided that the requirements of this section are met, and that the cost of restoration of the structure to a safe condition shall not exceed one hundred (100) percent of its replacement cost at the time of the Building Official declaration within two (2) years and meeting building codes;

- 708.02-2 No nonconforming structure may be enlarged or altered in any way which increases its non conformity; and any structure or portion thereof may be altered to decrease its non conformity;
- 708.02-3 Notwithstanding the provisions of Section 708.02-2 above, whenever repairs on or installation of plumbing fixtures in residential structures is required by law or administrative action of the Health Official or the Building Official, such alterations shall be permitted, provided that where such alterations require an addition to the structure, such addition shall be no nearer the lot line than permitted by the requirements of this Ordinance. Where an existing residential structure exceeds these requirements the said addition shall extend no nearer the lot line than the existing building line;
- 708.02-4 Should a nonconforming structure be moved, it shall thereafter conform to the yard dimension requirements of the district in which it is located after it is moved;
- 708.02-5 Should a nonconforming structure or nonconforming portion of a structure be destroyed by any means, it shall not be reconstructed to a greater degree of non conformity.

708.03 Nonconforming Uses of Land.

Where a lawful use of land exists at the time of enactment or amendment of this Ordinance that would not be permitted by the regulations imposed herein and where such is either (1) an accessory use involving the use of no separate accessory structure or (2) a principal use involving no individual structure, such use may be continued as long as it remains otherwise lawful, subject to the following provisions:

- 708.03-1 No such nonconforming use shall be enlarged or increased nor extended to occupy a greater area of land than was occupied at the time of enactment or amendment of this Ordinance;
- 708.03-2 No such nonconforming use shall be moved in whole or in part to any portion of the lot or parcel other than that occupied by such use at the time of enactment or amendment of this Ordinance;
- 708.03-3 In the event that such use ceases for reasons other than destruction for a period of more than one (1) year any subsequent use shall conform to all requirements of this Ordinance for the district in which the land is located;
- 708.03-4 No additional structure not conforming to the requirements of this Ordinance shall be constructed in connection with such nonconforming use.

708.04 Nonconforming Uses of Structure.

Where a lawful use involving an individual structure or structures in combination, exists at the time of enactment or amendment of this Ordinance, that would not be permitted in the district in which it is located under the requirements of this Ordinance, such use may be continued as long as it remains otherwise lawful, subject to the following provisions;

- 708.04-1 No structure existing at the time of enactment or amendment of this Ordinance devoted to a nonconforming use shall be enlarged, extended, moved, or structurally altered, except repairs on or installation of plumbing fixtures required by law or administrative action of the Health Official or the Building Official, or the changing of interior partitions or interior remodeling; or in changing the use of the structure to a conforming use;
- 708.04-2 Should a structure or portion thereof containing a nonconforming use be destroyed by any means other than fire or act of God, it shall not be reconstructed for any nonconforming use. Any use established in such a reconstructed building or portion thereof must be in conformity with the regulations of the district in which it is located.
- 708.04-3 Any structure or portion thereof destroyed by fire or act of God or declared unsafe by the Building Official may be restored to a safe condition, provided that the requirements of this

section are met, and that the cost of restoration of the structure to a safe condition shall not exceed one hundred (100) percent of its replacement cost at the time of the Building Official declaration if the work is done within two (2) years;

708.04-4 A nonconforming use of a structure may be extended to include use of the entire structure, but shall not be extended to include either additional structures or land outside the structure;

708.04-5 When a nonconforming use of a structure or structures and premises in combination is discontinued or abandoned for one (1) year, or for eighteen (18) months during any three year period, except when government action impedes access to the premises; or when a nonconforming use is superseded by a permitted use; the structure and premises shall not thereafter be used except in conformity with the regulations of the district in which it is located;

708.05 Replacement of Obsolete Structure.

Any non-conforming mobile home which lawfully existed on January 1, 1992 as either a non-conforming structure or a non-conforming use of land may at any time be replaced with a larger mobile home, provided that at the time of such replacement the owner of the lot shall provide evidence satisfactory to the zoning administrator that a mobile home of the same size as the existing mobile home is no longer being manufactured, and further provided that sanitary (septic or sewer) requirements can be met for the larger structure and that the setback regulations for the zoning district are met with the replacement mobile home. This section shall not apply if a variance to the applicable setback regulations would be required to place the larger structure on the lot. *Added 6/1995.*

SECTION 712
STANDARDS FOR TELECOMMUNICATION TOWERS & ANTENNAS

712.01 DEFINITIONS

Alternative tower structure: Man-made trees, clock towers, bell steeples, light poles, and similar alternative-design mounting structures that camouflage or conceal the presence of antennas or towers.

Antenna: Any apparatus designed for telephonic, data, radio, or television communications through the sending and/or receiving of electromagnetic waves.

FAA: The Federal Aviation Administration.

FCC: The Federal Communications Commission.

Height: When referring to a tower or other structure, the distance measured from ground level to the highest point on the tower or other structure, even if the highest point is an antenna or lightning rod.

Tower: Any structure that is designed and constructed primarily for the purpose of supporting one or more antennas, including self-supporting lattice towers, guy towers, or monopole towers. The term includes radio and television transmission towers, microwave towers, common-carrier towers, cellular telephone towers, alternative tower structures, and the like

712.02 USE REGULATIONS

The purpose of this ordinance is to establish general guidelines for the siting of towers and antennas. The goals of this ordinance are to:

- Encourage the location of towers in nonresidential areas and minimize the total number of towers and tower sites throughout the County,
- Encourage strongly the joint use of new and existing tower sites,
- Encourage users of towers and antennas to locate them, to the extent possible, in areas where the adverse impact on the community is minimal,
- Encourage users of towers and antennas to configure them in a way that minimizes the adverse visual impact of the towers and antennas, and
- To provide adequate sites for the provision of telecommunication services with minimal negative impact on the resources of the County.

This ordinance is intended to comply with all federal and state regulations.

712.03 APPLICABILITY *Amended 10/2010*

712.03-1 District Height Limitations.

The requirements set forth in this ordinance shall govern the location of towers that exceed, and antennas that are installed at greater than the maximum height for a structure as set forth in Section 700 Table 1 for the Zoning District in which the tower or antenna is located.

712.03-2 Amateur Radio and Receive-Only Antennas.

This ordinance shall not apply to and no permit shall be required for any tower or the installation of any antenna, that is (1) under 50 feet in height and is owned and operated by a federally-licensed amateur radio station operator or is (2) used exclusively for receive only antennas for amateur radio station operation.

712.03-3 Existing Structures and Towers.

The placement of an antenna on or in an existing structure such as a building, sign, light pole, water tank, or other freestanding structure or existing tower or pole shall be permitted so long as the addition of said antenna shall not result in the height of the antenna, tower or structure being in excess of the maximum height for a structure as set forth in Section 700, Table 1. Otherwise, the co-location of antennas on an existing tower or other structure shall require a conditional use permit. A permitted use under this section also may include the placement of additional buildings or other supporting equipment used in connection with said antenna so long as such building or equipment is placed within the existing structure or property and is necessary for such use.

712.04 GENERAL GUIDELINES AND REQUIREMENTS

712.04-1 Principal or Accessory Use

For purposes of determining compliance with area requirements, antennas and towers may be considered either principal or accessory uses. An existing use or an existing structure on the same lot shall not preclude the installation of antennas or towers on such lot. For purposes of determining whether the installation of a tower or antenna complies with district regulations, the dimensions of the entire lot shall control, even though the antennas or towers may be located on leased area within such lots. Towers that are constructed, and antennas that are installed, in accordance with the provisions of this ordinance shall not be deemed to constitute the expansion of a nonconforming use or structure.

712.04-2 Inventory of Existing Sites.

Each applicant for an antenna and or tower shall provide to the Zoning Administrator an inventory of all existing facilities within a five-mile radius of the proposed site, including specific information about the location, height, and existing use and available capacity of each tower. The Zoning Administrator may share such information with other applicants applying for approvals or conditional use permits under this ordinance or other organizations seeking to locate antennas within the jurisdiction of the County, provided, however that the Zoning Administrator shall not, by sharing such information, in any way represent or warrant that such sites are available or suitable.

712.04-3 Design; Lighting

The requirements set forth in this section shall govern the location of all towers and the installation of all antennas governed by this ordinance; provided however, that the Planning Commission and Board of Supervisors may waive any of these requirements if it determines that the goals of this ordinance are better served thereby.

- Towers shall either maintain a galvanized steel finish or, subject to any applicable

standards of the FAA, be painted a neutral color, so as to reduce visual obtrusiveness. Dish antennas will be of a neutral, non-reflective color with no logos.

- At a facility site, the design of the buildings and related structures shall, to the extent possible, use materials, colors, textures, screening, and landscaping that will blend the tower facilities to the natural setting and surrounding structures.
- If an antenna is installed on a structure other than a tower, the antenna and supporting electrical and mechanical equipment must be of a neutral color that is identical to, or closely compatible with, the color of the supporting structure so as to make the antenna and related equipment as visually unobtrusive as possible.
- Towers shall not be artificially lighted, unless required by the FAA or other applicable authority. If lighting is required, the Planning Commission and Board of Supervisors may review the available lighting alternatives and require the design that would cause the least disturbance to the surrounding views.
- No advertising of any type may be placed on the tower or accompanying facility unless as part of retrofitting an existing sign structure.
- To permit co-location, the tower shall be designed and constructed to permit extensions to a maximum height of 150 feet unless engineering justification is provided to document the additional height request.
- ~~Towers shall be designed to collapse within the lot lines or leased area in case of structural failure.~~ *Amended 10/2010*

712.05 FEDERAL REQUIREMENTS

All towers must meet or exceed current standards and regulations of the FAA, the FCC, and any other agency of the federal government with the authority to regulate towers and antennas.

712.06 BUILDING CODES

To ensure the structural integrity of towers, the owner of a tower shall ensure that it complies with standards contained in applicable federal, state and local building codes and regulations.

712.07 INFORMATION REQUIRED

Each applicant requesting a conditional use permit under this ordinance shall submit a scaled plan, a scaled elevation view and other supporting drawings, calculations, and other documentation, signed and sealed by appropriate licensed professionals, showing the location and dimensions of all improvements, including information concerning topography, radio frequency coverage, tower height requirements, set-backs, means of access, parking, fencing, landscaping and adjacent uses. The Planning Commission and Board of Supervisors may require other information to be necessary to assess compliance with this ordinance, including frequencies of transmission, in watts, and a copy of the antenna pattern. Additionally, applicant shall provide actual photographs of the site that include a simulated photographic image of the proposed tower. The photograph with the simulated image shall include the foreground, the mid-ground, and the background of the site.

712.07-1 All proposed towers must be compatible for co-location with a minimum of two (2) users including the primary user. The applicant must submit an engineering study certifying such multiple use is feasible. The governing body in a particular case may waive this provision for good cause shown. *Amended 10/2010*

712.07-2 The applicant shall provide copies of its co-location policy.

712.07-3 The applicant shall provide copies of propagation maps demonstrating that antennas and sites for possible co-locator antennas are no higher in elevation than necessary.

712.08 FACTORS CONSIDERED IN GRANTING CONDITIONAL USE PERMITS FOR NEW TOWERS

The applicant shall obtain a conditional use permit from the Giles County Planning Commission and Board of Supervisors before erecting towers or antennas covered by this article. The Planning Commission and Board of Supervisors shall consider the following factors in determining whether to issue a conditional use permit, although the Planning Commission and Board of Supervisors may waive or reduce the burden on the applicant of one or more of these criteria if the Planning Commission and Board of Supervisors concludes that the goals of this ordinance are better served thereby.

- a. Height of the proposed tower;
- b. Proximity of the tower to residential structures and residential district boundaries;
- c. Nature of the uses on adjacent and nearby properties;
- d. Surrounding topography;
- e. Surrounding tree coverage and foliage;
- f. Design of the tower, with particular reference to design characteristics that have the effect of reducing or eliminating visual obtrusiveness;
- g. Proposed ingress and egress;
- h. Co-location policy;
- i. Language of the lease agreement dealing with co-location; Consistency with the comprehensive plan and the purposes to be served by zoning;
- j.k. Availability of suitable existing towers and other structures as discussed below;
and
- k.l. Proximity to commercial or private airports.

712.09 AVAILABILITY OF SUITABLE EXISTING TOWERS OR OTHER STRUCTURES

No new tower shall be permitted unless the applicant demonstrates by clear and convincing evidence that no existing tower or structure can accommodate the applicant's proposed antenna. Evidence submitted to demonstrate that no existing tower or structure can accommodate the applicant's proposed antenna may consist of any of the following:

- a. No existing towers or structures are located within the geographic area required to meet applicant's engineering requirements.
- b. Existing towers or structures are not of sufficient height to meet applicant's engineering requirements.
- c. Existing towers or structures do not have sufficient structural strength to support applicant's proposed antenna and related equipment.
- d. The applicant's proposed antenna would cause electromagnetic interference with

the antenna on the existing towers or structures, or the antenna on the existing towers or structures would cause interference with the applicant's proposed antenna.

- e. The fees, costs, or contractual provisions required by the owner in order to share an existing tower or structure or to adapt an existing tower or structure for sharing are unreasonable. Costs exceeding the cost of new tower development are presumed to be unreasonable.
- f. The applicant demonstrates that there are other limiting factors that render existing towers and structures unsuitable.

712.10 SETBACKS

The following setback requirements shall apply to all towers and antennas for which a conditional use permit is required; provided, however, that the Planning Commission and Board of Supervisors may reduce the standard setback requirements if the goals of this ordinance would be better served thereby.

- a. Tower must be located so as to be a minimum of 110% of the height of the proposed tower from any off-site residential structure and any adjacent property owners.
- b. Towers, guys, and accessory facilities must satisfy the minimum zoning district setback requirements for primary structures.

712.11 SECURITY FENCING

Towers shall be enclosed by security fencing not less than six (6) feet in height and shall also be equipped with an appropriate anti-climbing device; provided, however, that the Planning Commission and Board of Supervisors may waive such requirements, if it deems appropriate.

712.12 LANDSCAPING

The following requirements shall govern the landscaping surrounding towers for which conditional use permit is required; provided, however, that the Planning Commission and Board of Supervisors may waive such requirements if the goals of this ordinance would be better served thereby.

- a. Tower facilities shall be landscaped prior to use of the facilities with a buffer of plant materials that effectively screen the view of the support buildings from adjacent properties. The standard buffer shall consist of a landscaped strip at least four (4) feet wide outside the perimeter of the facilities.
- b. In locations in which Planning Commission and Board of Supervisors finds that the visual impact of the tower would be minimal, the landscaping requirement may be reduced or waived.
- c. Existing mature tree growth and natural landforms on the site shall be preserved to the maximum extent possible. In some cases such as towers sited on large wooded lots, the Planning Commission and Board of Supervisors may determine that the natural growth around the property perimeter constitutes a sufficient buffer.
- d. Existing trees within two hundred (200) feet of the tower shall not be removed except as may be authorized to permit construction of the tower and installation of

access for vehicle utilities. In a particular case, this provision may be waived by a governing body.

712.13 LOCAL GOVERNMENT ACCESS

Owners of towers shall provide the County co-location opportunities as a community benefit to improve radio communication for County departments and emergency services, provided it does not conflict with the co-location requirement of section 712.07-1.

712.14 REMOVAL OF ABANDONED ANTENNAS AND TOWERS

Any antenna or tower that is not operated for a continuous period of twelve (12) months shall be considered abandoned, and the owner of each such antenna or tower shall remove same within ninety (90) days of receipt of notice from the County of Giles, notifying the owner of such removal requirement. Removal includes the removal of the tower, all tower and fence footers, underground cables and support buildings. Any buildings constructed in connection with an antenna or tower may remain on the site provided that the owner of the site consents. If there are two (2) or more users of a single tower, then this provision shall not become effective until all users cease using the tower. Notices given pursuant to this provision shall be given to the owner of the land upon which the tower or antenna is located and to the owner of such tower or antenna and shall be sent by certified mail, return receipt requested to the address listed on the Giles County tax records for the landowner and to the address listed in the annual report required pursuant to Section 712.15 for the owner of the tower or antenna.

If no response is made by the owner within the ninety (90) day period following notice, the County of Giles may cause the antenna or tower to be removed. The cost of removal shall be assessed to the landowner and/or antenna or tower owner as a lien equal to a tax lien. Prior to undertaking removal at the expense of the landowner, such owner shall be given an additional notice of thirty (30) days, in the same manner as set forth above, advising such owner that the tower or antenna has been abandoned and that the failure to remove same within thirty (30) days will result in removal by the County at the expense of the landowner.

712.15 REQUIRED YEARLY REPORT

The owner of each such antenna or tower shall submit a report to the Giles County Zoning Administrator, once a year, no later than July 1. The report shall state the current user status of the tower. Notification to the County is required of substantive changes at least fifteen (15) days prior to commencement.

712.16 REVIEW FEES

See Article 900 Schedule of Fees

Any out of pocket costs incurred for review by a licensed engineer of any of the information required above shall be paid by the applicant.

715.02

These standards for the keeping of honey bees and chickens shall apply in residential zones where agriculture is not permitted. In zones where agriculture is permitted the regulations of that zone shall apply. The keeping of honey bees and chickens as defined herein shall be permitted as an accessory use to single family dwelling in the following zones: R-1, R-2, R-3, and R-4.
